

4-axis IVF micromanipulator Narishige TAKANOME

NARISHIGE TAKANOME™ is a **four-axis hanging joystick oil hydraulic micromanipulator specially designed for IVF applications**. The optimal manipulator specifically made for handling suspension cells! Once having been set, the innovative fan-shaped driver never fails to return to where the pipette tip is supposed to be. The newly installed knob allows a pipette to move along its axis by using traditional and smooth oil hydraulic joystick. This manipulator will spare the laborious work of a pipette alignment with the optical axis, providing more time for objective operation.

Injectors are not included with the manipulator.

order code	Brand	Image	Name	Properties	QTY
NRG-MTK-1-O2	Narishige		TAKANOME for OLYMPUS IX71	CE MDD (Class1)	1
NRG-MTK-1-O1	Narishige		TAKANOME for OLYMPUS IX70	CE MDD (Class1)	1
NRG-MTK-1-O3	Narishige		TAKANOME for OLYMPUS IX73/IX83	CE MDD (Class1)	1
NRG-MTK-1-N1	Narishige		TAKANOME for NIKON ECLIPSE TE2000 / ECLIPSE Ti	CE MDD (Class1)	1
NRG-MTK-1-Z1	Narishige		TAKANOME for ZEISS AXIOVERT 200 / AXIO OBSERVER	CE MDD (Class1)	1
NRG-MTK-1-Z2	Narishige		TAKANOME for ZEISS AXIO VERT A1	CE MDD (Class1)	1
NRG-MTK-1-L1	Narishige		TAKANOME for LEICA DMI3000B / DMI4000B / DMI6000B / not DMIRB	CE MDD (Class1)	1
NRG-MTK-1-L2	Narishige		TAKANOME for LEICA DMI8	CE MDD (Class1)	1
