

Canister & lifter

Description / Use

Cryo Bio System canisters are the sleeves that hold the goblets. They are compatible with all types of liquid nitrogen and vapor freezers, and also low-temperature mechanical freezers.

Five lengths of canisters are available, with a capacity of 2 to 6 goblets stored on top of each other. A colored flag can be placed on the lifter to facilitate retrieval.

Canisters are placed in the nitrogen freezer before filling the container with liquid nitrogen. Goblets are introduced and retrieved one by one with the metal lifter; all manipulation of goblets is in the cold environment of the neck of the nitrogen freezer to ensure the stable low temperature of the samples.

Diameter: 70 mm.

order code	Brand	Image	Name	Properties	QTY
CBS-007147	CBS - Cryo Bio System		Canister	2-shelf, for classical goblets Ø65mm without cover	1
CBS-007148	CBS - Cryo Bio System		Canister	3-shelf, for classical goblets Ø65mm without cover	1
CBS-007149	CBS - Cryo Bio System		Canister	4-shelf, for classical goblets Ø65mm without cover	1
CBS-007150	CBS - Cryo Bio System		Canister	5-shelf, for classical goblets Ø65mm without cover	1
CBS-007151	CBS - Cryo Bio System		Canister	6-shelf, for classical goblets Ø65mm without cover	1
CBS-008644	CBS - Cryo Bio System		Canister	2-shelf, for Daisy goblets	1
CBS-008645	CBS - Cryo Bio System		Canister	3-shelf, for Daisy goblets	1
